GIN

700ml

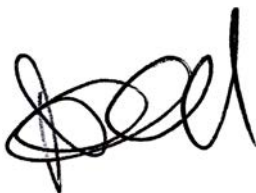

We began producing our original recipe gin in the basement of a house in 2015. Moving production from our Head Distiller's basement to a renovated mill, we craft our spirits in Burnley, Lancashire.

As a small, family-run business, with an inventive team, we work together to experiment, innovate and produce only the best craft spirits.

We have a remarkable range of spirits which include award-winning gins, vodkas and rums. Some of which are produced in limited quantities as exclusive releases following the success of Batch Innovations, our monthly spirits subscription.

As a team, we are big on flavour and Batch Innovations allows us to experiment with a range of exotic botanicals to produce bold, distinct spirits. A number of which have been awarded international medals. Most notably San Francisco World Spirits Competition (SFWSC) Double Gold and Best Gin medals, awarded to Batch Industrial Strength Gin, placing it among the finest spirits in the world. Other awards include SFWSC silver and bronze, International Wine and Spirits Competition (IWSC) silver, Lancashire Life Product of the Year and Lancashire Tourism Producer of the Year.

Thank you for taking an interest in our spirits. If you'd like to chat to us further or if there's something you're looking for and cannot see it listed, please get in touch.

## Batch PX Sherry Cask Rum

This rum is inspired by our trips to the Caribbean and the south of Spain. It is barrel-aged for over a year in a cask previously used to store Pedro Ximénez sherry. Ageing in the barrel results in a subtle candied fig and date flavour, balanced with notes of chocolate, coffee, liquorice and spices.

**ABV 53%.**

## Tasting Notes

### On the nose

Rich, dried fruits.

### On the palate

Bold and oaky.

### Finish

Waves of creamy toffee.

## Cuba Libre

25ml Batch Rum  
2 wedges of lime  
200ml cola  
Ice

Fill a glass with ice. Squeeze and drop two lime wedges into the glass, coating the ice with the juices. Pour in the Rum, top up with chilled cola and stir gently.
